ACADEMIC EARLY WARNING SYSTEM

Model Evaluation Record

Card 08 | Evaluation pending

Complete from a verified evaluation run. No accuracy result is asserted in this document.

Evaluator / date / training and evaluation code version

Model artifact/version, profile and feature order

Dataset source / synthetic or real / consent and restrictions

Split method, rows, class counts and duplicate/student leakage controls

Record a held-out evaluation, independent of training. Verify no final outcome leaks into predictors. Distinguish stored historical metrics from results reproduced on this version.

Confusion matrix: TP / FP / FN / TN for High Risk

Accuracy / High Risk precision and recall / F1 / evaluated sample count

Metric calculation/run evidence link

Fallback behavior and how model source is communicated

Limitations / representativeness / generalization risks

Review decision / reviewer / date
